

Family Christmas

Family Christmas marked an important milestone as the church celebrated, in grandness, the very first service at the brand new 3000-seat Sanctuary. The flashing floodlights, electrifying sound and spirited atmosphere made it a Christmas to remember. We speak to Trinitarians and visitors alike who were part of this joyous celebration.

The Christmas message presented through story and song

It was really great to be in the Sanctuary. It felt like being in the theatre watching a movie with a good sound system! Christmas to me is a reminder that Jesus Christ came to die for my sins and He is worthy to be praised and honoured. I enjoyed singing the Christmas carols. I wish the service would last longer so that there would be even more performances and more carols to be sung!

Being in the 3000-seat auditorium made it seem like a grand celebration and the atmosphere was electrifying. My first impression was that it is so wonderful to see so many people gathered under one roof celebrating the birthday of Jesus. It felt like a grand celebration with a family. I especially enjoyed the singing of 'We Three Kings' as it felt so heartfelt. At the same time, it was wonderful seeing the congregation supporting their pastors when they sang. The introduction of 'Awesome God' was a majestic prelude to the whole song and it really meant so much to sing it on the birthday of Jesus.

This was my first time celebrating Christmas in Trinity and the service was energetic; there was an amazing sense of celebration. The 3000-seater was – wow! – fantastic and amazing. I enjoyed the worship a lot. It had a powerful impact on us because God promises to draw near to His people when we draw near to Him. I also enjoyed singing the hymns and the older songs.

It was grand being in the Sanctuary and I felt like I was watching a play. The seats were very comfortable and I believe it would be a pull factor for the young and the young at heart. I enjoyed the Christmas songs and it was great being able to celebrate Christmas with my cell members.
